Profile

I am a talented front-end developer with management skills who has proven his ability to grow and manage a team of developers.

Experience

Manager of Front-end Engineering, onefinestay — Aug 2011 - present

While at onefinestay my responsibilities include the architecture and development of full-stack applications for use by guests, hosts, and internal tools for staff. Managing and deploying multiple django applications, utilising various cutting-edge front-end technologies such as SASS, Backbone, ReactJS, Webpack and Gulp. I lead a team of 6 developers and am responsible for hiring and managing the team including budgeting, employee reviews, and distribution of work.

Front-End Developer, Ministry of Sound — May 2010 - Aug 2011

I was the sole front-end developer on a small team responsible for the Ministry of Sound website, and their associated labels such as HedKandi and Global Underground. Working closely with both the team of server-side developers and the designer we rebuilt the catalog of Ministry of Sound websites including a custom payment gateway, and commerce for album and club sales.

Web Developer, Digicon — Mar 2009 - Sep 2009

Designing and developing sites for clients based on Digicons custom CMS platform.

Web Designer, IMP — Jan 2008 - Jan 2009

Designed and skinned multiple sites and landing pages to provide access to IMP's catalog of media.

QA Tester, E4E — Sep 2006 - Aug 2007

Beta tested computer games and provided bug reports to the developers.

Graphic Designer, Printing.com — Jun 2005 - Jul 2006

Designed logos and business cards for multiple small business clients.

Education

Griffith University, Australia — Bachelor of Digital Design, 2004
